

# NEIGHBORHOOD EFFICIENCY PROGRAM

Mississippi Power's Neighborhood Efficiency Program (NEP) identifies neighborhoods throughout our service territory to receive a free in-home energy audit by a trained professional. We identify neighborhoods through a variety of community organizations. This program is designed to educate customers on simple, low-cost ways to save money and energy.

## What is the NEP process?

1. Contact Mississippi Power to schedule your in-home energy audit - 855-693-8326.
2. A Mississippi Power Energy Auditor will visit your home to conduct a free assessment.
3. If your home qualifies for additional savings measures, such as insulation, we will arrange for a trained professional to revisit your home to install these measures, again at no cost to you.
